Pacific Bay International

RDM-4 RODSMITH QUAD ROD DRYER

2. ASSEMBLY AND SETUP OF "THE RODSMITH QUAD ROD DRYER"

Completed Quad Rod Dryer

A. Attach the 4 chucks onto the motor shafts by aligning the screws on the chucks with the holes in the motor shafts and tighten the screws for a secure fit.

B. Insert the Motor & Chuck Stand into the Motor Stand Base with the power cord on the bottom and the power switches facing you. The stand should be leaning away from you.

C. Insert the two metal pins through the Motor Stand Base and the Motor & Chuck Stand to ensure they are joined securely.

D. Insert each Rod Support Side Frame into a Rod Support Base. When placed side by side the Rod Support Side Frames should lean in the same direction.

E. Insert the rod pins through all pieces to ensure they are joined together securely.

F. Attach the Rod Support Cross Bars to the Rod Support Side Frames. Each Cross Bar has 2 holes for mounting pins.

G. Please note there are two bottom holes for each Cross Bar. With the unit facing away from you, use the rear hole if the dryer will be used as a table top dryer. Use the front hole if the dryer will be mounted on the wall.

H. Tighten all screws to make certain all parts are tight.

I. Attach one Rod Support Roller to each Rod Support Cross Bar in the desired location.

3. WALL MOUNT ASSEMBLY INSTRUCTIONS

J. If the unit is to be wall mounted, use the furnished screws to attach the larger brackets to the Motor & Chuck Stand as shown in the illustration indicated by the circles.

K. Use the furnished screws to attach the 4 smaller brackets to the rod supports.
