# Pacific Bay International RODSMITH POWER WRAPPER XL

## 2. ASSEMBLY AND SETUP OF "THE RODSMITH XL ROD WRAPPER"

- A. Connect the Headstock Assembly to a pair of aluminum Tubes.
- B. Connect the aluminum Tubes to a Connecting Base and continue the process with the next set of Tubes and Connecting Base.
- C. Connect the ends of the 3rd set of Tubes to the terminating Connecting Base.
- D. Using the set screws, attach the two Brackets to the inside ends of the three Thread Carrier Slide Rails.
- E. Attach the Thread Carrier to the Slide Rails. Make certain the Rail edges are positioned in the wheel grooves.
- F. Place the Thread Carrier Slide Rail Connecting Brackets at each end of the aluminum Tube frame. This will insure the proper distance between the Thread Carrier and the rod.
- G. Attach the Rod Supports to the aluminum tubes by pushing the Rod Supports down firmly directly onto the tube base.
- H. To move the Rod Support to the desired position, hold the aluminum base tubes firmly with your left hand and slide the Rod Support with your right hand.
- I. To remove the Rod Support from the aluminum Base tilt the Rod Support sideways.
- J. The assembled RW-XL can be mounted securely to a workbench or table by using wood screws through the holes in the Connecting Base plates. You may also use a heavy tape such as duct tape to fasten the Connecting Bases onto the workbench or table.

### Additional Rod Building Products From Pacific Bay:

#### RodSmith QUAD Rod Dryer:

##### Cost Effective Solution for the Serious Rod Builder

Complete up to four rods at a time. Each of the four independent motors can hold up to a 1.5" diameter rod. Includes wall mount brackets to free up valuable table space.
